

TILE Decko^{MC/TM}

THE MOST CONVENIENT CONCEPT FOR EXISTING SURFACES

THE SOLUTION FOR DECK COVERING

Benefits and possibilities

- Large choice of colours, styles and combinations
- Unique, customized look that is different from the rectilinear, traditional approach
- Covers wood decks and concrete patios (only interesting option on the market to cover concrete)
- Very quick and easy installation
- Maintenance-free, anti-skid surface (even when wet); does not absorb heat
- No splinters
- Competitively priced in comparison to fibreglass
- Light, long-lasting material; as easy to cut as wood

Easy to install

- Prior installation of a membrane on the wood renders the surface watertight
- Concrete steps can very easily be covered
- Trim completes the installation for a surface with no visible screws
